KEEPING WATER AT ITS BEST

Produced in three body types, with a range of flow and pressure to suit most requirements.

- ◆ Box trailer (*RFB1000/600*) – flow rate from 24 to 60m³/hr & up to 4.2 bar
- ◆ Flat bed trailer (*RFF1000/400*) – flow rate up to 60m³/hr & up to 4.2 bar
- ◆ Compact GRP (*RFC250*) – flow rate up to 15m³/hr @ 1.5 bar

Box Trailer

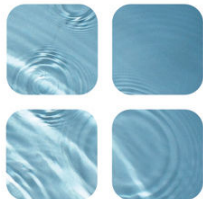

RFS 250 Unit

Key points of the RF Transfer Units

- ◆ Fluid Category 5 compliant with type AB air gap
- ◆ WRAS (or equivalent) approved pipework and fittings
- ◆ Standard quick release bayonet type connections on the inlet and outlet points.
- ◆ Rapid fill and delivery, rated from 15 to 60 m³/hr at between 1.0 to 4.2 bar head.
- ◆ Flow indicator with totaliser and programmable batch controller
- ◆ Low level water safety shut off device and pressure relief valve.
- ◆ GSM communication (optional) for monitoring, control and alarm out.
- ◆ Twin axles on RFF's and RFB's with corner jack stands for safety and stability.
- ◆ Choice of diesel engine, external generator or 110V power supply
- ◆ Optional chlorine dosing (up to 1 mg/l) using proportional injection

If our standard range does not match your requirements, we will be happy to discuss your specification with no obligation.
